Jeff R. Greenberg, Hewlett-Packard Professional Books**

Greenberg introduces "proof-of-concept" prototyping techniques that deliver maximum information for decision-making. He also demonstrates new techniques for high availability by considering infrastructure requirements like architecture, networking, backup, and recovery early on. Walk step-by-step through the logistics of staging and proliferating new hardware and software. Understand preparing sterile systems and staging tapes, establishing a command center, transferring data, educating users, managing support handoffs, holding useful project postmortems, and much more. This book delivers the nitty-gritty expertise, tools and forms you need to do an outstanding job of deploying client/server, intranet or Internet technology. Don't manage or sponsor a project without it!
